## AID IN THE PREVENTION OF DEEP VEIN THROMBOSIS

THE GREATEST RISK IS NOT TAKING ACTION.

### USE CIRCUL8 TO AID IN THE PREVENTION OF BLOOD CLOTS

The Circul8 is intended to be an easy to use portable system, prescribed by a physician, for use in the home or clinical setting to help prevent the onset of DVT in patients by stimulating blood flow in the extremities (stimulating muscle contractions).

**This device can be used to**

- Aid in the prevention of DVT
- Enhance blood circulation
- Diminish post-operative pain and swelling
- Reducing wound healing time

PORTABLE

EASY TO USE

LIGHTWEIGHT

BATTERY OPERATED

RECHARGEABLE

## CIRCUL8 - HOW IT WORKS

Circul8 is a revolutionary device that is designed to prevent deep vein thrombosis (DVT).

### 1. Place on Calf

Open wrap and place around your calf with inflatable part of wrap on calf.

### 1. Turn on

Press and hold power button on both units for 3 seconds and release. Device will start.

### 1. Pressure & Charging

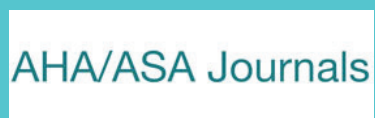

Now the device will gently fill with air and create pressure on your calf. Recharge device when needed.

## DVT and Cosmetic Surgery

"Abdominoplasty consistently has the highest published rates of DVT and PE in plastic surgery..."
