

The Cork Medical Products Wound Dressing Accessories are designed to be used in conjunction with a (NPWT) pump to provide negative pressure wound therapy to aid and promote wound healing by removing excess exudates, infectious material, and tissue debris.

### Y-CONNECTOR

Simultaneously treat and manage multiple wounds on patient

### Y-CONNECTOR

Part Number: CWY-100

The Cork Medical Y-Connector is designed to simultaneously treat multiple wounds on the same patient. The multiple wounds should be the same etiology requiring the same pressure settings.

The Cork Medical Y-Connector is indicated for:

- Compatible with all Nisus NPWT wound dressings

### 24" EXTENSION TUBING

Add length to port pad tubing for wounds located in distal areas

### 24" EXTENSION TUBING

Part Number: CSP-100-ES-EXT

Cork Medical 24" Extension Tubing is used to add length to port pad tubing and will aid in increasing mobility for patients with a wound located on distal portions of the body.

Cork Medical 24" Extension Tubing is indicated for:

- Single wounds where the patient needs longer tubing to increase mobility

### BRIDGE FOAM KIT

Bridge posterior wounds, minimizing pressure to surrounding tissue  
21.75" (L) x 1.96" (W)

### BRIDGE FOAM

Part Number: NIS-BRDR-A-16

Cork Medical Bridge Foam bridges posterior wounds to the lateral or anterior surface, minimizing drainage/port pad tubing-related pressure to surrounding tissue.

The Cork Medical Bridge Foam is indicated for:

- Bridging the port pad away from any wound where pressure might be applied to the port pad

### HYDROLITE WHITE FOAM

Absorbs wound drainage and provides a barrier against water and bacteria when used as a secondary dressing  
3.75" (L) x 3.75" (W)

### HYDROLITE WHITE FOAM WOUND DRESSING

Part Number: FOAM-WHITE-A-16

The Cork Medical HydroLite White Foam Wound Dressing is a sterile, absorbent, polyurethane foam wound dressing. HydroLite White Foam absorbs wound drainage, promotes a moist environment helpful to healing, and serves as a barrier against water and bacteria when used as a secondary dressing.

The HydroLite White Foam Wound Dressing is indicated for:

- Minor abrasions, minor lacerations, and minor scalds and burns.
- Dermal ulcers (e.g., pressure ulcers, leg ulcers, and other secreting lesions)
- More severe lacerations, cuts and abrasions
- Second degree burns
- Donor sites
- Other superficial wounds
